

Planning for Data Base Structure

Date: 11-09-2020

Venue/ Mode: Google meet

Attendance:

J v Sathya Krishna	Present
M Sindhuja	Present
Sneha mol	Present
M Aishwarya	Present
Gummadi Avinash	Present
E Pavan	Present

Notes

- Discussed about data base structure
- Discussion about collection of requirements.

Decisions:

- Krishna, sindhuja, aishwarya are collected requirements from all batches of our college.
- Sneha noted all those points and everyone discussed about it
- We finally came to conclusion what requirements should be included to our project.
- And we grouped so of the requirement's and which are common.
- Krishna Discussed about database structure with sneha for some time.
- Then they came to the conclusion and explained to all other teammates about the database structure i.e., we are having one database in which we are multiple tables like student details, login details, candidate details, login details and admin details, login details and their fields and relationships and we will had table for every election in that table we will store details of vote and voters.

Action items

- Going to start preparation of SRS document.
