Notes

- Discussed about which server to use and install
- Everyone submitted their view of design and ideas about project
- Everyone became familiar with GitHub
- Discussed about which coding platform to be used for project

Decisions

- We thought of ampps and xampp server but for installing Ampps is difficult compared to Xampp server.
- So, everyone installed Xampp server.
- Sneha, krishna are interested in using visual studio code for coding. And sindhuja, avinash, aishwarya and pavan are using sublime text.
- And krishna asked for the basic implementation of the system like login form.

Action items

- Design for the projects and stating basic implementation
