E Pavan	Present

Notes
- Team Formation
- Project Theme

Decisions

We had formed a team with six members. And then, we discussed about the Domain. After discussion we came to know that only Krishna has experience in App Development and in Web Development Krishna, Sneha and Sindhuja has experience. Avinash lacks experience but has knowledge about Web Development. Aishwarya and Pavan are learning Web Development. So, we decided to do Web Application for project. As we know that among 6 members only 3 has the experience so work roles goes like:
- Krishna- Team leader, Backend developer, Frontend developer (web designer)
- Sneha – content writer, Backend developer
- Sindhuja – Test Leader, Frontend developer
- Avinash - Test Programmer, Frontend Developer
- Pavan – Content writer (Helper), Frontend developer
- Aishwarya - Test Programmer, Frontend Developer

And we Decided to work on the Web Development.
